Message from the Course Director

Dear Colleague,

It is a matter of great pleasure for me to introduce the 10th edition of the Master Class in Liver Disease series. This latest edition is planned as a three-day program on the 28th, 29th February and 1st March 2020 in Chennai, India. This meeting is being organized jointly in association with the Liver Transplant Society of India (LTSI), the pan-Indian organisation for liver transplant professionals.

The MCLD series was started in Chennai, India in 2009 as a way to teach and discuss current & relevant topics in liver disease in India & the Asian subcontinent. Over the last 10 years it has transformed into one of the most eagerly awaited annual academic gathering for both experts and trainees in the field of hepatology and liver transplantation.

The title for the 10th edition is 'Transcending Barriers in Living Donor Liver Transplantation'. The success of Living Donor liver transplantation has transformed and challenged long established practices in the field of deceased donor Liver Transplantation. During this edition, we hope to discuss and debate a wide range of challenges in current LDLT practice including 'too-sick to transplant' recipients, controversial indications, marginal live Liver Donors, and challenging postoperative situations. The first two days are planned as multi-disciplinary sessions and will concentrate on the evaluation and optimisation of recipients and the peri-operative care of donors & recipients respectively. The last day is organized as four parallel sessions catering to the interests of adult & pediatric hepatologists, anesthesia-intensive care specialists and surgeons. As always, the faculty for the meeting includes a galaxy of world-renowned experts from India & abroad.

Over the years, MCLD has become as well known for its culinary delights and hospitality as for its scientific content. The ITC Grand Chola in Central Chennai is once again the venue of the 2020 meeting and we hope you will be able to join us there- to discuss, debate & learn in a relaxed atmosphere!

Kind regards,
Mohamed Rela

DAY - 1

Session 1: Setting it up

LDLT: Where are We and How Did We Get There?
Challenges in LDLT for the Next Decade
Evolution of Pediatric LDLT

Session 2: Too Sick to Transplant?

Going beyond MELD Score- Assessment of the Sick Recipient
Recipient with recent Sepsis: Strategies and timing of
LDLT for Acute on Chronic Liver Failure: Current Status

Session 3: Acute Liver Failure: Pushing the Envelope

Debate: Standard DDLT Criteria for acute liver failure are irrelevant
in the LDLT Setting
Extra-Corporeal Therapies in ALF: Current Status
Defining the Indications & Expected Outcomes of APOLT in ALF?

Session 4: Liver Disease with Other Organs

Gut Function & Microbiota in Chronic Liver Disease and its Impact
on Transplant Outcomes
Chronic Encephalopathy in the Recipient
Assessment & Optimisation of the Frail Recipient

Session 5: Panel Discussion

Managing the Recipient with Significant Coronary
Artery Disease - What is the Evidence?

Session 6: Transplant Oncology: Hepatocellular Carcinoma

Assessing Tumor Biology in HCC: State of the Art
Debate: Portal Vein Tumor Thrombus - Not the End of the Road
Management of Recurrent HCC after Liver Transplant

Session 7: Transplant Oncology: Other tumors

Colorectal Liver Metastases
Cholangiocarcinoma
Neuro-Endocrine Tumors
Hepatoblastoma

DAY - 2

Session 8: Safe Donor Surgery

Current Status of Minimally Invasive Donor Hepatectomy
Preoperative optimisation of donors with NAFLD- what is
Achievable & Safe?
Factors Affecting Liver Regeneration after Donor Hepatectomy:
Lessons from & for HBP Surgeons

Session 9: Ethics of Donor Selection

Double Equipoise in the Era of Broadening Indications for LDLT
Altruistic Donation in LDLT - Feasibility & Safeguards
Altruistic Donation from Patients Undergoing Elective Surgery:
A wild dream?

Session 10: Recipient Operation

Current status of ABO Incompatible Liver Transplantation:
Protocols, Short-Term & Long-Term Results
Collateral Ligation & Portal Inflow Modulation in LDLT
Can Left Lobe Graft be the Future of Adult LDLT?

Session 11: Post-Transplant Challenges

Early Allograft Dysfunction: Role of Plasma Exchange
Seizures in the Early Transplant Period
Peri-operative Acute Cardiac Dysfunction
Morbidity Associated with RRT in the Postop Period
Thrombocytopenia after LDLT

Session 12: Technical complications

Management of Biliary Strictures After LDLT
Portal Venous Complications after LDLT in Adults
Portal Venous Complications after LDLT in Children
Hepatic Artery Thrombosis After Liver Transplant: Is Retransplant
the Only Option?

Session 13: Long Term Outcomes After LDLT

Outcome After LDLT- How can we Improve Transparency?
How do Liver Donors do in the Long Term?
Long-term Outcomes in Children After Liver Transplantation
Post-Transplant Malignancies: Strategies to Beat the Odds

DAY - 3

Session 14: Specialty Breakout Sessions

Session 15: Multidisciplinary Single Topic Consensus Meeting

REGISTRATION

	Early Bird Registration Upto 31 st January 2020	Regular Registration Upto 27 th February 2020
Indian Delegate	9000 INR	12000 INR
Indian Trainee	5000 INR	7000 INR
International Delegate	150 USD	250 USD
International Trainee	100 USD	150 USD
