Dear Senior Colleague,

**Re: AMD R and D Post**

As you will be aware, I reviewed the OTDT Medical Team Structure in November 2020 as part of the restructuring of NHSBT. As a result, we have managed to install four senior clinicians to the Associate Medical Director roles and an Associate Director role.

An additional and new post, Associate Medical Director – Research and Development role has now been approved. This new role within OTDT Clinical team provides a unique opportunity to provide clinical leadership in organ donation and transplantation Research and Development (R&D) at a UK level. I would encourage applications from clinicians working within the field of transplantation research who have held or currently hold a leadership role. The attached job description and person specification provides more detail with regards to the roles and responsibilities of the post holder. My Senior PA, Sarah Allen will be able to arrange discussions with Rachel Johnson and/or Derek Manas (as my successor) and can be contacted via email [sarah.allen@nhsbt.nhs.uk](mailto:sarah.allen@nhsbt.nhs.uk).

Applications will be via NHS Jobs <https://www.jobs.nhs.uk/xi/vacancy/916860561>

Yours sincerely

**Professor John Forsythe**  
Medical Director – (OTDT)  
NHS Blood and Transplant
